

FOR A CONTEMPORARY FEEL

**Silent Gliss**

# WAVE CURTAIN

# Contemporary curtain design

Silent Gliss has created a unique curtain heading system that turns traditional curtains into a striking, modern design statement. Wave offers a contemporary look throughout the curtain drop: when opened, the curtains stack back neatly, and when closed the fabric hangs in a smooth, continuous wave.

Together with our Silent Track curtain range, Wave offers the perfect interior design solution.

## NEAT CURTAIN STACK-BACK

Undulating curves when your curtains are closed transform into a neat stack-back when opened.

#### WAVE CURTAIN TRACKS

Wave is compatible with a variety of Silent Gliss systems:

- Electrically operated curtain tracks
- Hand or cord operated curtain tracks
- Hand operated Metropole

#### QUALITY SINCE 1952

When you choose bespoke curtains from Silent Gliss, you can be assured of high quality products and manufacturing standards associated with an established, world-leading brand.

Our experienced and trained staff are on hand to offer advice and support for even the most challenging projects. Whatever the level of complexity, Silent Gliss can guide you through the entire process from measuring to fitting the finished curtains.

# The reinvention of the classic curtain.

### WAVE CURTAIN FABRICS

Silent Gliss offers a wide range of flame retardant fabrics which have been tested and proven to work well with our Wave curtain heading.

If non-Silent Gliss fabrics are being selected it is important to seek professional advice since not all fabrics are suitable for Wave curtains.

### COLORAMA® – A SILENT GLISS EXCLUSIVE

In 1981 Silent Gliss introduced an exclusive fabric that was to transform the internal shading industry: **Colorama**.

This sophisticated, soft and flame retardant fabric is woven to guarantee optimum hanging performance for both Swiss Pleat and Wave curtains. Such is its versatility it's available in thirty colours, three transparencies and various finishes including Acoustic, Multicolour, Eco and Bioactive. In addition to being highly decorative Colorama has Standard 100 by Oeko-Tex® and Cradle to Cradle Certified™ Bronze sustainability credentials.

80mm

60mm

### PLANNING YOUR CURTAIN – GLIDER SPACING

The wave effect is achieved by a unique glider-cord contained inside the curtain track which stops the fabric being pulled flat when the curtains are closed.

The evenly spaced gliders ensure a continuous wave effect throughout the full width and drop of the curtains.

Choose from 80mm or 60mm spaced glider cord:

- 80mm gives larger, more defined waves and is perfect for long curtain drops and heavier fabrics. The deeper waves result in a smaller curtain stack but you should allow a minimum fitting space of 160mm.
- 60mm creates a shallower wave and lends itself to short curtains and lightweight fabrics. You should allow a minimum fitting space of 120mm.

## Curtains that dress themselves.

## *The Architects of Silence*

*Silent Gliss is the leading global supplier of premium interior window treatments. Since 1952 we have been tirelessly committed to the development of the worlds' smoothest, quietest systems using state of the art technology.*

*Driven by customer needs, Silent Gliss offers functional and durable products. Expert technical advice coupled with installation and support services complete the offer. Silent Gliss stands for innovative, sustainable, tailor made solutions, exceptional design and first-class quality.*
